

TIGHTENING METHOD

FLY-B-DURATEC-01K FLYWHEEL

BOLTS.

ISSUE DATE: March 2007

PAGE No: 1 of 1

Torque setting:

ARP lube 85 lb ft

Engine oil 105 lb ft

METHOD

We advise the use of ARP lubricant on the thread and under head of bolt.

Engine oil can be used instead if ARP lube is not available but please use relevant torque setting.

1. Pull up the fastener so that it is 'snug'.
2. Torque to 85 lb ft (ARP lube)
